« With the Xylophone bell, the children come into the classrooms more quietly ... »

José Passos,
Technical Manager

- Founded in 1952
- 1814 students
- 18 sounders Harmonys ordered

José Passos, Technical Manager at the French School Charles Lepierre in Lisbon, is explaining us why he chose the Harmonys Bell system.

OUR NEED

“With the old bell system, the sound was **strident** and **this was stressful for the children**. We needed a more functional system, more modern capable of broadcasting melodies **in particular areas at different times.**” explains Monsieur Passos.

THE CHOICE

“We have chosen Harmonys Bodet's Synchronised Bell, Class Change & PA System for its **usability**, its **simplicity of installation**, its **multiple functionalities** and for the **quality of the training.**” he continued.

BENEFITS OF THIS BELL SYSTEM

“**Very satisfied** of our installation, we want to increase the total number of sounders to complete the refectory's equipment. Thanks to the software, we are able to personalize the name of the sounders in order to **save time** when doing settings. We also noticed that now the children come into the classrooms with greater calm with the use of the Xylophone melody.” concludes Mister Passos.
